

Don't Just Walk Away! Don't Ignore Your Foreclosure. You Have Options.

If You Would You Like To Buy A Home Again Soon Then **Don't Walk Away!**

Hello ABRAHAM,

Having a home in foreclosure is a very difficult situation. But walking away or doing nothing about it is much worse and can cause a lot of other problems for you.

I meet with a lot of people just like you who don't realize that even though they may end up losing their home, they don't have to ruin their lives for years to come. You see, you may not realize but there is a way to save your credit.

Just because you're going through a bad time now doesn't make you a bad person or a deadbeat. In today's economy foreclosure is affecting a lot of good people too. People who can move on with their lives if they could only get out from under a house that's not worth as much as they owe or a house they simply can't afford right now.

Well, we use a tool called a Short Sale to buy houses and get foreclosures stopped. It allows us to buy a house that we want and it allows you to move on without having a foreclosure on your credit report.

We're not real estate agents and **I'm not looking to "list" your house. I'm interested in buying it!** When you work with me, it won't cost you a dime. **You won't pay me any commissions, fees or retainers** whatsoever! Why? Because **we BUY houses**, not LIST them. My sole business is buying houses.

So keep this letter handy and when you're ready to have this mess over with you can reach me at **954-616-5325**.

Sincerely,

Barry Cunningham

Foreclosure By The Numbers

250

the amount of points that your credit score will drop

7-10

the number of years it will take before you can get another mortgage

1

the number of calls you'll need to make to resolve your foreclosure
